

THE NATURAL HISTORY SOCIETY.

A Meeting of the Society was held for the exhibition of Microscopic objects on February 22nd. Mr. T. N. Hutchinson kindly lent his drawing-room for the evening, and made a short address on Microscopes, dwelling especially on their polarizing apparatus. Microscopic objects were exhibited by Messrs. Wilson, Hutchinson, Robertson, Kitchener, E. J. Norton, and F. R. Smith.

A frog under the action of ether was exhibited to show the circulation of the blood. The frog is reported to be doing well since the operation.

A change was made in the method of electing members; the ballot is not to be used, but names are to be submitted to a committee for election. H. G. Wauton, J. P. Baynes, W. H. Pike, M. W. E. De Bunsen, and E. J. Norton were elected members.

J. H. Davies has been appointed Secretary.

The property of the Society is at present kept at Mr. Kitchener's, where members have access to it on Mondays, Tuesdays, and Thursdays, between 2 and 6.

A meeting will be held on March 7th, in Sixth School at quarter to eight, when papers are promised by Mr. Wilson, "on the Victoria Works;" and by J. H. Davies, "on Sensitive Plants."

On March 21st, a paper will be read by G. F. Helm, Esq., "On the circulation of the blood."

R. S. R. C.

It may interest some to hear what is at present contemplated with regard to the organization of the Rifle Corps. We hope to receive official permission from the War Office this week to be enrolled. As two permanent Officers are required to command the Corps, Mr. J. S. Philpotts, whom we would here thank for the great interest he has always taken in the Corps, has kindly taken on him the arduous duty of Captain, and Mr. H. Lee Warner has taken the post of Lieutenant. We can at present only muster 63 members over 17 years of age, but hope that we shall soon see the numbers swell.

The Cadet Corps will remain on exactly the same footing as hitherto; it numbers

about 60, so that at present we have 120 members in the Rifle Corps.

The question of a New Range is still undecided, but it is hoped that something definite will be settled by the end of the month.

We have great pleasure in recording a victory as the result of the first expedition made by the Corps this year. On Saturday, Feb. 22, a team went over to visit the Coventry Corps, and notwithstanding the hurricane that was blowing, succeeded in making a very creditable score. Fewer misses should have been made at the 200 yards' range, but at the longer distance the shooting was considerably improved. The Coventry Corps were hardly in their usual form, or we should probably have a different tale to tell; as it is, however, the R. S. R. V. may congratulate themselves heartily on having achieved a victory over such cracks. Score:—

The sun was shining brightly the whole time, and the wind blowing a hurricane from left to right.

The Baldwin Challenge Cup was competed for on Thursday, February 27th. We are glad to see that some fresh blood has been infused into the Corps, and the old members of the XI. will have to work hard to hold their own against such shooting as won the Cup on Thursday. The day was bitterly cold, and the wind very strong from left to right. The winner, Corporal Botfield, made an excellent score of 40 at the three ranges,
